

**Which is the biggest balloon ?  
The most powerful one ?  
Which is the maximum  
lighted area ?**

Airstar has no or very few technical limits to manufacture very large balloons.

At this time, the biggest round-shaped balloon is 10 meters/ 32.75feet in diameter. It is used for the show of a trapezist.

The biggest balloon is not always the most powerful.

The most powerful balloon in the classical ranges is Solarc 700 and the maximal lighted area is 4 hectares.
